**Note:**

**If all income is received on the same schedule**

***Example: alimony = \$100–month & pension = \$300–month***

**DO NOT use conversion factors**

**If family reports income sources from more than one schedule**

***Example: alimony = \$100–month & pension = \$300–week***

**Income MUST be converted to yearly.**

Yearly Income = Monthly x 12

Yearly Income = Twice Per Month x 24

Yearly Income = Every Two Weeks x 26

Yearly Income = Week x 52

**DO NOT round the values resulting from each conversion**
